

08/31/2026

****** POLICY CHANGE******

Please note as of today we will now be assessing a \$1.00/CWT crop year discount on all black beans carried over from previous crop years. This will be in addition to our normal storage rates in effect.

Crop year discount examples:

2022 crop = \$4.00/CWT

2023 crop = \$3.00/CWT

2024 crop = \$ 2.00/CWT

2025 crop = \$1.00/ CWT

It is necessary for us to continue to move product on a consistent basis to turn inventory, have fresh product to meet our customer specifications & expectations, and create space for the next crop cycle. Edible beans also shrink in storage over time creating shortages.

Thank you for your continued support.

Roger
